

**TEMPLATE DRAWINGS** are available to assist you in placing any model of ARO self-feed tool into your machine design.

**Tracing style template** drawings are available in limited quantities. Specify drawings by template number and the corresponding tool number or accessory part number when making a request. See list below for tracing style templates.

**Electronic templates** are available for users of CAD in a single CD-ROM. This design provides drawings of most models and accessories in the formats of Autocad 12, Autocad 13, DFX and IGES. Use of this pictorial data will provide the necessary drawings to speed up the process of machine or fixture design. **Request CD-ROM Design Templates for CAD, version 2.1.**

To request any templates simply call, fax or write your regional office. See inside back cover for office listings.
