

Electric Fastening Tools and Systems

The Ingersoll-Rand line of electric fastening tools meets a wide range of requirements from .3 in.-lbs. to 450 Nm capacity. It includes the VersaTec and VersaTec ESD screwdrivers, as well as the ES Series electric and CS Series cordless tools. IR also offers cordless battery powered pulse models. For greater capacity and more sophisticated fastening strategies, check our extensive D Series model offering, all featuring innovative ergonomic design and unique performance advantages. IR Torque Management Systems, including the Insight controllers, are covered in the next section, and provide the operating parameters that ensure the ultimate in precision fastening.
