New Product Line from JDV Products Inc.

STATIC ERASER - ELIMINATES STATIC AT THE SOURCE

Static electricity attracts dust, dirt, produces dangerous sparks, disrupts line production and inhibits paint adhesion.

Vessel Static Erasers are ideal for removing static from plastics, printed film, electronics, optical devices, food service, cosmetic processing, or anywhere static charge is an issue.

The compact design of the **Vessel Static Erasers** is a departure from the bulky conventional ionizing devices used at secondary operations. Parts can now be electrically balanced as they exit the mold with a blast of static neutralizing ionized air.

Design considerations include:

- Compact and lightweight
- Easy to use
- Designed for safety
- Space saving
- UL & CE approved
- Variety of models to suit any application:
 - **SDJ-02** / Attaches directly to end-of-arm-tooling
 - **SDJ-03** / Wide angle nozzle can blow directly onto the pieces or into a hopper
 - **SDJ-05** / Fan type with Ion Balance control
 - **SDJ-06** / Hand-held unit with wide angle nozzle
 - **SDJ-07** / Precision fan is ideal for using on a bench top
 - **SDJ-08** / Removable clip allows mounting on a stand or bench top
