New improved Hand Wrap/Unwrap Tool

HWUR224

JDV Products has improved the hand wrap/unwrap tool HWUR224.

Our tool, made of high quality aluminum, is equipped with a longer 1.2 inch knurl throughout the grip area. The overall length is only 5.5 inches so it will fit comfortably in the tool pouch.

The new design also include a relieved area behind the helix. The unwrapped wire coils into the relieved area while unwrapping and is removed by simply pulling the unwrapped wire at a right angle to the tool.

The hand wrap/unwrap tool is ideal for wrapping/unwrapping 22-24 AWG wire with ease. It takes only a seconds to switch from wrap to unwrap by simply removing the end cap from one end to the other. The end cap resists loosening during unwrap operations. Contact JDV Products Inc. for additional details about this products or on our complete line of wire wrap tools, hand and air tools, nippers, end of arm tooling and static eliminators, or visit our website: www.jdvproducts.com
